THIS PLACE WHO FOR WHAT

WHAT IS #HACK?

Launched by Indigitous in 2016, #HACK is the largest global hackathon aimed at taking the gospel to new people, new places and new spaces.

WHERE IS THE #HACK?

Online and in person, #HACK is usually a weekend event at a location convenient to you.

WHO WILL BE AT #HACK?

People who have a passion for bringing the Gospel to new people, new places and new spaces, and who are ready to use their skills, experience and capabilities.

Invite your friends and make new ones!

WHY #HACK?

There are still 3 billion people who don't know not Jesus. How can we innovate and collaborate for help discover Jesus?

#HACK

It's what...!

https://hack.indigitous.org/faq/

....?....
#HACK
C'est Quoi...!

- What is a hackathon?

A combination of the words "HACK" and MARATHON, a HACKATHON is a specific event during which

people from the Technology Sector and adjacent sectors collaborate to create

solutions to specific challenges.

This practical event is aimed at programmers, developers, engineers, specialists in

user experience, project managers and others. People with technical training

come together, form teams around a problem or an idea and together develop a

single solution.

- How is The Indigitous #HACK unique?

The Indigitous #HACK brings together those with a desire to bring the gospel to new people, new places, and new spaces. As an event led by

volunteers, #HACK provides participants with the opportunity to meet the needs of mission, church and society on a local and global

scale. We learn from each other, we make new friends, and we create Kingdom impact through a sprint

of innovation.

- What's happening at #HACK?

Exact times are coordinated by each site. Typically during the event a number of local and global challenges are shared, teams are

formed and work towards creating a unique solution.

- Why join #HACK?

#HACK is an opportunity to create solutions that have lasting impact, to solve problems

faced by global and local communities, to make new friends and

have fun while doing it.

- When and where does the event take place?

#HACK is a series of locally organized events around the world during the month of October.

- What is mass collaboration?

Mass collaboration is a form of collective action where a large number of people, who

may have no previous connection, work effectively and creatively to achieve

of a common objective. The greater the diversity of skills represented on each team , the greater the team's ability to successfully tackle

the task at hand.

#HACK is a global mass collaboration, connecting like-minded believers

same ideas in all parts of the world through expertise and prayer.

- How much does it cost to register for #HACK?

The cost of registration varies and is determined by location.

- Is #HACK only for people who know how to code?

#HACK welcomes anyone interested in collaborating on mission-driven technology projects with long-term impact. Although our work focuses on multiple

technology platforms, you don't have to be a programmer to get involved. We

we need designers, photographers, editors, project managers, design gurus

social media - creative thinkers of all types! There skill there more important East there

ability has to work in team And has find of the solutions to problems . Furthermore, although

Indigitous #HACK is explicitly Christian, participants of any faith (or without) are

welcome.

- Are there any costs for partner organizations?

No, other than preparing the appropriate materials/resources for those who want to work

on your project or challenge.

- What types of challenges/requests do you accept?

Those that require a technical, digital, UX/UI, data analysis or communications solution that does not currently exist.

- Approximately how many hours of work will be accomplished during the #HACK?

Between 10 and 30 hours, depending on the specific schedule of the #HACK location.

....?....

#HACK
C'est Quoi...!

https://hack.indigicous.org/faq/

- Who will work on our challenge?

We will offer your challenge to our #HACK sites for participants to choose if they choose.

wish and if they have the necessary skills.

- Will a finished product be produced during the #HACK?

#HACK is a weekend-long innovation sprint and the completion rate depends on the proposed challenge.

- What happens after the #HACK?

Depending on individual teams and partner organizations, more collaboration

push, internships or paid work can be put in place.

- Will we receive support during the hackathon?

Absolutely. Our international team will be available to help you prepare before and

during the event.

In Bongo-Project

https://hack.indigitous.org/faq/

Bongo-Project

It's Artificial Intelligence in

digital strategy model to know

God personally according to his word

for everyone and everything.

INTERFACE :

–*Online internet platform*

– *Online mobile web application*

–*USSD audios & texts*

ÿUse of simple mobile phones either

with USSD system / SMS & Audios system

ÿUse of smartphones (Android / Tablet /

iPhone…)

ÿUse of the web browser on other miscellaneous

digital support

Approach Web Internet Application / Online Mobile Application

ÿInternet Web Online application:

With a web browser, log in, start AI Chats

with the platform using an AI ChatBot

ÿ The mobile application can be installed on any platform

and allows online digital interaction with a first

identification window with his telephone number and his

mail address.

ÿThe mobile application is the chatbot part of the application
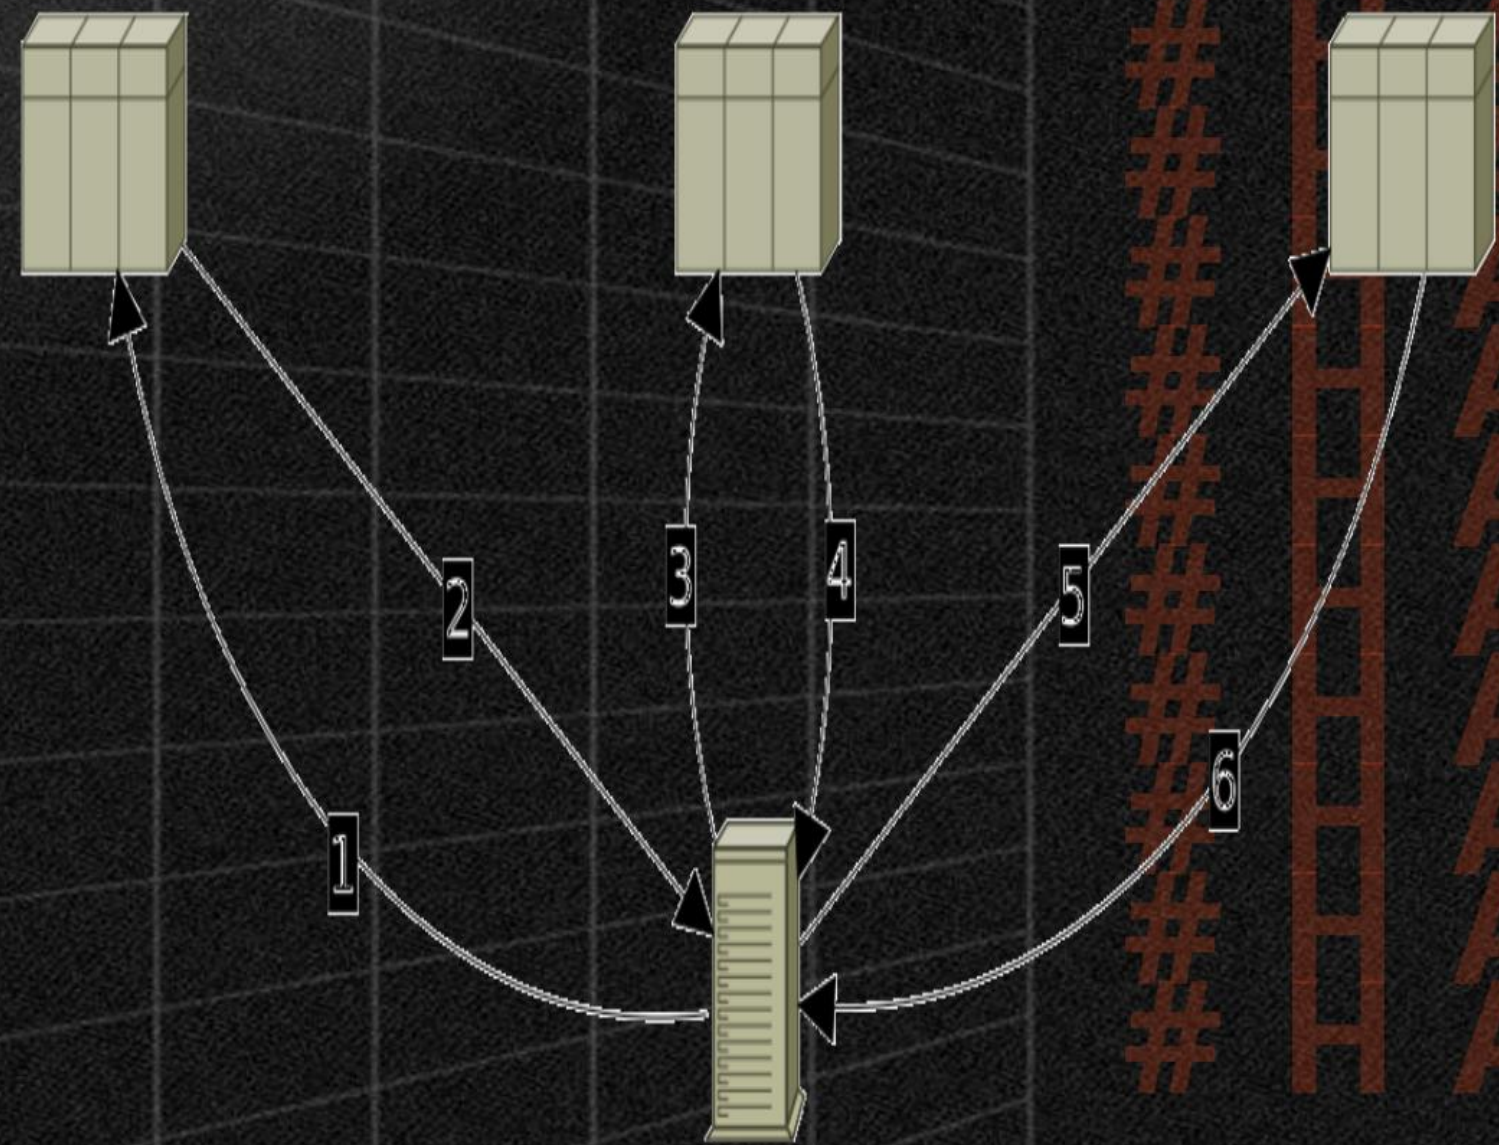

internet web which is installed on the digital support

Approach Web internet application / Online mobile application on PC

ÿThe functionalities remain the same on the

smartphone.

ÿThe particularity here is the possibility

activation of various functionalities of the

communications and browser usage

depending on its needs and availability.

REQUEST MANAGEMENT

- Depending on the usual media, the recipes are

  3 shapes:

  – USSD/SMS to a system number

  – AI chatbot on web browser

  – Navigation on mobile application according to the types of

  digital medium used

- In chat modules, requests are

  short questions with key words either

  Bible/Book/Chapter/Verse is still a subject of

  meditation or a question of sharing the faith.

- The user ends the measurement of the satisfaction of the need in connection with digital interaction

- The application can direct to a travel process on a other site or linked application for progress or to other equipment for specific use

- The system can restart exchanges following the trading periods. defined times as needed for as long as the user keeps the application available online

Operating support (Tools)

- We plan to exploit twilo or other digital interaction solutions that may exist for SMS messaging

- We are thinking of starting with the Bible in full text version – audios in local language of preference (Kikongo/kituba) and the four spiritual laws as usual materials

- We are thinking of making use of online materials starting with the system of ordinary phone sms messaging

Challenges 1

#HACK

USSD approach…!

https://hack.indigitous.org/faq/

HOW DO YOU ACHIEVE USSD/SMS-AUDIO APPROACH

ÿUSSD system: Depending on the availability of offers from

mobile network operators with integrated AI approach.

ÿSMS system: Depending on the programming, integrate into the

usage platform with an available contact number

with integrated AI approach.

ÿContacting the platform allows you to register
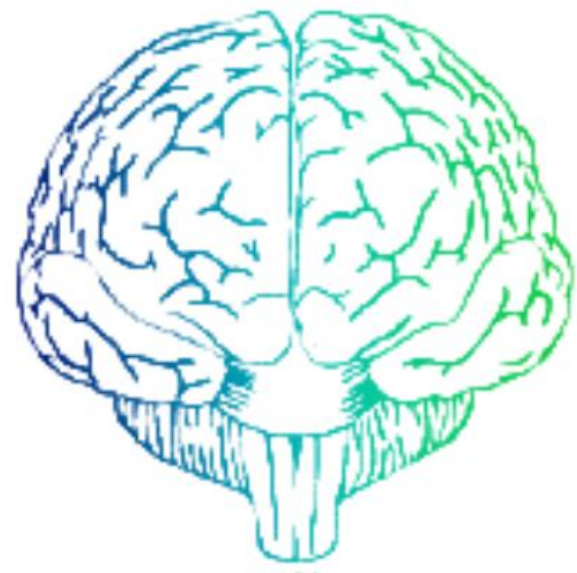

automatically on the platform upon first contact

with his telephone number.
